Office Action Summary

The preliminary amendment of 10/11/01 has been entered. The amendment amended claims 12, 13-15, 17, 18, 22 and 24-25, and added new claims 26-36.

Claims in the application are 1-36.

5 Restriction to one of the following inventions is required under 35 U.S.C. 121:

- 10 I. Claims 1-14, drawn to methods and products involving using an organic solvent in producing a sol, or gel therefrom, containing a biological material such as a cell, classified in class 435, subclass 176.
- II. Claims 15-26 and 28-36, drawn to methods and products involving producing a sol, or gel therefrom, containing a biological material such as a cell without using an organic solvent, classified in class 435, subclass 395.
- 15 III. Claim 27, drawn to a sol containing nutrients to support a cell, classified in class 435, subclass 243.

The inventions are distinct, each from the other because:

The inventions of I, II and III each can be performed without carrying out any other invention. The methods and products of inventions I and II are mutually exclusive due to the presence of an organic solvent in invention I and the absence of an organic solvent in invention II. The sol of invention III can have a use other than to contain a biological material as in inventions I and II. For example, the sol containing nutrients of invention III can be used as a component of a medium for culturing a microorganism without the sol containing the

25

microorganism before culturing. Additionally, the sol of invention III can be produced by a method different than methods required by inventions I and II.

Because these inventions are distinct for the reasons given above
5 and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even
10 though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application.
15 Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
